JOURNAL QUALITY LIST

Twenty-third Edition, 12 October 2006
Compiled and edited by Dr. Anne-Wil Harzing, <http://www.harzing.com>

Introduction

The Journal Quality List is published primarily to assist academics to target papers at journals of an appropriate standard. We would be concerned if the list were used for staff evaluation purposes in a mechanistic way. Whilst every effort has been made to ensure the accuracy of the Journal Quality List, we recommend that it be checked before used extensively for evaluation purposes. The editor will not be held responsible for omissions or errors.

Acknowledgements

The first version of the JQL was collated when the editor was with the University of Bradford School of Management (UBSM). The editor gratefully acknowledges the assistance and contributions of the following people: Kathy Cousens (UBSM) for the initial data entry work, Jos Benders, Yehuda Baruch, Malachy Carey, Graham Hooley, Gunther Maier, and Andrew Kirchner for pointing out and supplying me with various journal ranking lists and providing corrections, and my former colleagues at the University of Bradford School of Management for their feedback. Special thanks are due to Marieke Mensch-Mathijssen, librarian at the Technical University of Eindhoven, the Netherlands who supplied me with a list of ISSN numbers and corrected many journal titles.

Subject areas and abbreviations

Abbreviation	Subject area
Bus Hist	Business History
Comm	Communication
Economics	Economics
Entrep	Entrepreneurship
F&A	Finance & Accounting
Gen & Strat	General & Strategy
Innovation	Innovation
Marketing	Marketing
MIS, KM	Management Information Systems, Knowledge Management
OB/OS, HRM, IR	Organisation Behavior/Studies, Human Resource Management, Industrial Relations
OR, MS & POM	Operations Research, Management Science, Production & Operations Management
PSM	Public Sector Management
Psychology	Psychology
Sociology	Sociology
Tourism	Tourism

DISCUSSION OF THE RANKINGS

NL94 — VSNU 1994

List constructed by VSNU (Vereniging Samenwerkende Nederlandse Universiteiten — Association of Co-operating Dutch Universities) and based on a survey of Dutch academics in economics and business. Has a bias towards Economics, Finance and Quantitative Methods, but covers all subject areas mentioned above.

Rank	Interpretation
A	Top publications in heavily refereed journals
B	Excellent publications in - mostly - English and heavily refereed journals
C	Very good publications in refereed journals
D	Good publications in moderately refereed journals
E	Publications in other journals

NL99 — NL 1999

List based on a survey of opinions of academics in Business Administration in the Netherlands (Professors, Directors of Research Schools & Editorial Board members of *Maandblad voor Accountancy & Bedrijfseconomie*, *Bedrijfskunde*, *International Journal of Research in Marketing* and *Journal of Empirical Finance*). Please note that this list has a narrower focus than the VSNU 1994 list and covers only F&A, General & Strategy, Marketing, OS, QM & MIS.

Rank	Interpretation
A	Top academic journals
A (P)	Top professional journals
B	Very good academic journals
B (P)	Very good professional journals
C	Good academic journals
C (P)	Good professional journals

Not95 — Nottingham University 1995

List based on a survey of opinions of 397 UK academics from 27 institutions (all institutions rated 5 or 4 in the 1992 RAE and a random selection of 3-rated institutions). Academics were asked to rate a predefined list of journals "using a 1-5 scale, where 1 represents the lowest and 5 the highest quality assessment, bearing in mind the forthcoming Research Assessment Exercise". Journals with less than 10 responses were not included in the list.

Score	Interpretation
5.0	Highest quality assessment
1.1-4.9	Intermediate quality assessments
1.0	Lowest quality assessment

Bfd97 — Bradford Appendix 1997

This appendix was produced in an attempt to improve upon the grading of journals in the VSNU (NL 1994) listing. This listing was circulated to all members of staff, who were asked to suggest modifications, upon the assumption that A - C grades represented journals of international standing. The list should be read in conjunction with other lists (especially the VSNU 1994 list) and should not be used as a list on its own.

Rank	Interpretation
A	Top publications in heavily refereed journals
B	Excellent publications in - mostly - English and heavily refereed journals
C	Very good publications in refereed journals
D	Good publications in moderately refereed journals
E	Publications in other journals
Q	New journals for which judgments on their standing would be premature

US98 — VCU 1998

List used by the Virginia Commonwealth University for determining doctoral-level graduate faculty status in the US, uses author affiliation indices (AAI). The AAI is the ratio of articles authored by faculty at 60 US universities and colleges with highly rated business programs to total articles authored by faculty at US universities and colleges. As such it is an objective, peer-based measure of the extent to which one competes against faculty at highly rated U.S. universities in order to publish in the journal. Ratings from 0.01 to 1.00, with higher ratings indicating higher level journals. Journals with a 0.00 score are journals that are seen as important, but for which data are not yet available.

Score	Interpretation
1.00	Highest quality rating
0.02-0.99	Intermediate quality ratings
0.01	Lowest quality rating
0.00	Important journal, but insufficient data available

SMJ99 — Strategic Management Journal 1999

Published as Tahai & Meyer (1999), *Strategic Management Journal*, vol. 20, pp. 279-296. The list attempts to determine which management journals have the greatest influence on the field of management. Uses a dataset of 1275 articles published in 17 source journals (the top 17 management journals in the SSCI) over a 2-year period. Journals that are cited most frequently are those that have had the most influence on the current literature (i.e., revealed preference). Journals are ranked by citation frequency (1= most cited, 65 = least cited).

Rank	Interpretation
1	Most cited journal
2-64	Other cited journals, by decreasing citation frequency
65	Least cited journal

WIE01 — WU Wien Journal Rating 2001

List developed by the Wirtschaftsuniversität Wien (Vienna University of Economics and Business Administration). For more information and the complete list see: http://www.wu-wien.ac.at/fides-/rating-definition_en.html).

[Editor's note] The WU Wien list contains over 1700 entries, but only entries in the research areas covered by the current JQL have been included.

Rank	Interpretation
A+	Top journals with world-wide distribution and readership; covering the entire scope of a discipline; contributions are scientifically and methodologically most fastidious and innovative; very frequently pioneer work and milestones of the respective discipline; incomprehensible for non-scientists or readers without in-depth method knowledge; toughest competition of authors from all over the world (very high refusal rate of manuscripts); refereed in a double blind procedure (at least two referees).

A	World-wide distributed journals; emphasis in just one linguistic area as the exception; covering an entire discipline or an established subdiscipline; contributions are scientifically and methodologically most fastidious and innovative; frequently pioneer work and milestones of the respective discipline; understandable for graduates of relevant studies; strong competition of authors from an international realm; refereed in a double blind procedure (at least two referees).
B	Journals with at least supraregional distribution in any language; covering at least an established subdiscipline; contributions are scientifically or methodologically innovative; understandable for practitioners without any degree in relevant studies; manuscript submissions from a supraregional realm; refereed in a double blind procedure (at least two referees).
C	At least national distribution; covering at least established subdiscipline; the editors pay attention to legibility for non-scientist, although research results have editorial priority; practitioners rank among the core target group; at least national contributions; not necessarily anonymously refereed; however one external referee at least.
D	At least national distribution; specialized on any level; contributions contain results in simplified form; practitioners appear frequently as authors; contributions are aimed at teaching or vocational training of practitioners; at least national contributions; no formal reviewing procedures.

UQ03 — University of Queensland Journal Rating 2003

This list was constructed in three stages:

1. Construction of a mega-database (over 2,000 titles) based on ratings and rankings from over 120 sources.
2. Allocation of each title to one of 5 tiers (1 = highest, 5 = lowest) on the basis of the second highest rating from the rating/ranking sources (i.e., the rating must be from at least two sources).
3. The data base was supplied to the six discipline cluster leaders in the school as a resource that they could use to construct the official list (which comprises 588 journals). They could use the mega-database or any other source to justify each journal's rating.

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (ranking 4&5) of the UQ list were only added if they already featured in the JQL. An exception was made for Australasian journals and journals in the area of Entrepreneurship and Communication, since these journals/areas were underrepresented in the other ranking lists included in the JQL.

Rank	Interpretation
1	Highest quality rating
2	Intermediate quality ratings
3	
4	
5	Lowest quality rating

VHB03 — Association of Professors of Mgmt in German speaking countries

A ranking developed on behalf of the Association of University Professors of Management in German speaking countries (Verband der Hochschullehrer für Betriebswirtschaft - VHB). Based on a highly interactive and individualised survey distributed via the Internet, 651 professors and university researchers in Germany, Austria and Switzerland assessed the scientific quality of both articles and review processes of journals they were familiar with.

The Ranking with over 1,500 journals covers all fields of business administration (e.g., management, marketing, finance, accounting) and related areas (e.g., economics, psychology,

political science). The evaluation scale ranged from 1 (very low) to 10 (very high). The results were adjusted according to the different experience levels of the respondents.

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (ranking D&E) of the VHB list were only added if they already featured in the JQL. The same principle was applied to German-language journals. The list also included a range of engineering and computer science journals that were not included in the JQL as they were seen as less relevant to Management/Business/Economics.

Journals that were ranked by less than 10 (but more than 5) respondents, were only included if they (a) already featured in the JQL or (b) had a score of A or A+. These journals are indicated with a letter score in brackets, e.g. (A). Five journals that were right on the borderline between scores (e.g. with a score of 7.998) were assigned the higher level score.

Rank	Interpretation
A+	VHB-JourQual Index ≥ 9
A	VHB-JourQual Index ≥ 8
B	VHB-JourQual Index ≥ 7
C	VHB-JourQual Index ≥ 6
D	VHB-JourQual Index ≥ 5
E	VHB-JourQual Index < 5

BJM04 — British Jnl of Management 2001 Business & Mgmt RAE rankings

Published as Geary, J.; Marriott, L.; Rowlinson, M. (2004) *Journal Rankings in Business and Management and the 2001 Research Assessment Exercise in the UK*, British Journal of Management, vol. 15, pp. 95-141.

This list is based on the premise that academic staff in institutions with a higher RAE rating will tend to publish in higher-quality journals. Journals are therefore rated based on the frequency with which they are included in each of the seven RAE ratings (5*, 5, 4, 3A, 3B, 2, 1). Theoretically this means that a journal's score could run from 1 (only cited in RAE submissions from institutions with a 1 – lowest – rating) to 7 (only cited in RAE submissions from institutions with a 5* – highest – rating). Since academics in institutions rated 1 or 2 tend to publish very little, the practical range is 3-7, while most journals are in the 4-7 range. The BJM04 list includes 562 journals that accounted for 83% of the citations in the RAE submissions. As recommended in the article median scores were used rather than mean scores.

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (ranking 1-4) of the BJM04 list were only added if they already featured in the JQL. Journals that had less than 10 submissions are indicated with the respective score in brackets. Please note that some journals only had 1 or 2 submissions and hence scores can be idiosyncratic.

Score	Interpretation
7	Highest; only or mostly cited in RAE level 5* submissions
1.5-6.5	Intermediate scores reflect the frequency with which the journal was cited at each RAE level, weighted against the RAE level.
1	Lowest; only or mostly cited in RAE level 1 submissions

CNRS04 — Centre National de la Recherche Scientifique (www.cnrs.fr)

Ranking of journals in Economics and Business constructed by the French *Centre National de la Recherche Scientifique*. The list of journals was constructed through consultation with experts in the field, both in France and abroad. Directors of the various research groups (and through them the researchers in these groups) were consulted in an iterative process. Rankings of foreign universities were also consulted as well as listings such as SSCI and EconLit. Only academic peer-reviewed journals were included in the list and hence it excludes high-ranked professional journals such as Harvard Business Review. Rankings are based on several criteria: academic reputation, audience and impact. It is the intention of

CNRS to re-evaluate the list on a regular basis. For more information see:
<http://hp.idefi.cnrs.fr/marty/comnat/revues.pdf>.

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (ranking 1-3 stars) of the CNRS04 list were only added if they already featured in the JQL. The list seems to have an emphasis on Economics. Eight of the ten 5-rated journals are in Economics, while this is the case for two thirds of the 4-rated journals. While journals in F&A, OR/MS/POM and MIS/KM have a fair number of 3 and 4-rated journals, the vast majority of journals in Management (OB/HR/OS and Gen & Strategy) and Marketing are rated 1 or 2.

Rank	Interpretation
5	Highest quality rating (only 10 journals were given this ranking)
4	Intermediate quality ratings
3	
2	
1	Lowest quality rating

Ess05 — ESSEC Business School Paris 2005/2006

ESSEC is one of the top French business schools. Its journal ranking list was established 14 years ago. The ranking of a journal was decided by a committee of seven ESSEC professors with outstanding performance in research. Factors considered are the aim and scope of the journal, the quality of its board, the SCCL impact factor, external opinions about the journal, quality of the papers, readership, scale of distribution in libraries, journal lifetime, refereeing process, etc. Although it is based on a relatively small number of key informants, the list was included to provide a French perspective on journal rankings.

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (2-4) were only added if they already featured in the JQL. Also excluded were journals in the area of law, politics, mathematics, computing (unless related to OR), psychology (unless related to OB), and medicine as well as most French journals. Several journals had to be excluded because their titles were ambiguous and/or could not be found in public sources.]

Rank	Interpretation
0	Recognised internationally as the best in the discipline
1	Top international journals
2	Lower level international or national journals
3	Professional journals aimed at an academic/managerial audience or academic journals with limited circulation
4	Professional journals aimed at a managerial audience

HKB05 — Hong Kong Baptist University School of Business 2005

List approved by the Executive Committee of HKBU, April 2005. Ratings on a A , B+, B and B- scale, where A represents the highest and B- the lowest rating.

[Editors note] Journals that were mentioned on the HKBU list, but not on any other list, were only included if they had at least a B ranking. Law journals were excluded, as were Statistics & Probability journals unless they already appeared on the list. The HKB00 list was used as a basis, so journals that did appear on the 2000 list, but were no longer included in the HKB05 list are still included in the JQL.

Rank	Interpretation
A	Highest quality rating
B+	Intermediate quality ratings
B	
B-	Lowest quality rating

Theo05 — Theoharakis et al.

The Theoharakis et al. index aggregates perceived journal rankings based on surveys among 7 different populations of academics and PhD students in seven different scholarly fields (Management, Marketing, Finance, Accounting, Economics, Information Systems and Statistics). Respondents were asked to choose from a comprehensive list of journals in their respective field and rank up to 10 journals as top tier and up to 10 journals as second tier based on each journal's contribution to the discipline in terms of rigor, prestige and importance. The calculated index combines a journal's average rank position with its familiarity (i.e. the number of respondents who placed the respective journal among their top 20), assigning a decreasing weight to lower rank positions. The overall (world) index was used, which has a theoretical maximum of 100. Index figures for the Information Systems subfield were calculated manually from the available raw data.

The surveys have been published in a variety of discipline-based journals between 2001 and 2005. One paper is still under review. For more information on the various listings, see: <http://www.alba.edu.gr/survey/> For the purpose of the JQL the seven different surveys have been combined to **one** aggregate list. It should be noted, however, that comparison across sub-disciplines is only possible in a very limited way, since each survey is based on a different survey population and ranks the journals relative to each other.

[Editor's note] For journals that were included in the list of more than one scholarly field, the highest index score is reported. In consultation with the authors, the ranking for Production and Operations Management had to be excluded as it followed a different methodology. Statistics journals were only included if they already featured in the JQL. The small set of other journals that were not yet featured in the JQL were also ignored since they had low quality scores (below 5 in most cases below 10 in virtually all cases).

Rank	Interpretation
95	Highest quality rating
1.3-94.9	Intermediate quality ratings
1.2	Lowest quality rating

AST06 — Aston 2006

New version of the Aston lists originally published in 1999/2003. The 1999 list was based on a large survey of opinions of academics of the Midlands universities. In 2003 this list was sent to Aston research convenors for discussion within their group and each group then sent in revised lists which formed the basis of the new rankings. Anybody who wanted to add a journal was asked to provide evidence, preferably citation evidence from the World of Knowledge Data Base, but failing that expert opinions in the field from other universities. In the 2006 "rankings are made on the basis of citation rates, impact factors, interrogation of data bases and the evaluations of senior academic staff in Aston Business School and other international business schools. They are subject to change as the standing and impact of journals changes."

[Editors note] Journals that were mentioned on the Aston 2006 list, but not on any other list, were only included if they had at least a 3 ranking. Law journals were excluded. Where journals were ranked differently in different subdisciplines, the highest rating was used.]

Rank	Interpretation
3	World leading
3	Internationally excellent
2	Recognised internationally
1	Recognised nationally
0	Unclassified

Cra06 — Cranfield University School of Management September 2006

This list provides guidelines to staff on which journals they should consider submitting their papers to. It should be noted that the grading for each journal is the School's view, and will guide the School's submission to the RAE 2008. The projected grading has been produced using a large number of internal and external sources, including journal impact factors.

[Editor's note] If a journal of the Cranfield list was not already included in the JQL (which was rare), it was only added if it had a score of 3 or 4.

Rank	Interpretation
4	World leading
3	Top international
2	Lower international
1	National

HMB06 — Harvey-Morris Business Journals Listing

The first version of this list was published by Bristol Business School in June 2004 and circulated to all business school Deans and Research Directors in the UK. Numerous other colleagues have since been supplied with copies. In introducing the first version, the editors invited feedback on the list. Responses were received from colleagues covering the full range of specialisms included. Many of their proposals have been incorporated into this second version following further investigation of status claims by the editors.

The original list stems from an analysis of where UK academics declared publications for the purposes of RAE 2001. Other journals were then added through comparison with other lists in circulation. Rankings in these lists were standardized at this stage, bearing in mind the UK RAE 2008 classification of research outputs as 4* (top international), 3* (international), 2* (top national) and 1* (national). Copies of one or more editions of each journal were scrutinized by the editors (a process made possible by electronic access in most cases) and a provisional BBS grade awarded. These grades were then reviewed and amended as agreed with nominated subject experts from within and outside Bristol Business School. Following publication of the first version of the list, feedback was received from numerous specialist reviewers and this gave rise to revisions to the BBS grading.

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (1 and 2) were only added if they already featured in the JQL. Also excluded were journals in the area of law, education (unless related to Management), psychology (unless related to OB), and medicine. Higher ranked journals that were not featured in any of the other rankings in the JQL were only added if they had at least 5 submissions at the 2001 RAE.

Rank	Interpretation
4*	World Elite Academic Journal
4	Top international journals
3	International level journals
2	Top national journals
1	National level journals

Financial Times Survey of Top Business Schools 2006

Journals used by the Financial Times to compile their lists of top Business Schools are marked with an asterisk in the JQL and are listed below.

Academy of Management Perspectives (Academy of Management/OUP)
Academy of Management Journal (Academy of Management, Ada, Ohio)
Academy of Management Review (Academy of Management)
Accounting, Organisations and Society (Elsevier)
Administrative Science Quarterly (Cornell University)
California Management Review (UC Berkeley)

Econometrica (Econometric Society, University of Chicago)
Entrepreneurship Theory and Practice (Baylor University, Waco, Texas)
Harvard Business Review (Harvard Business School Publishing)
Human Resource Management (John Wiley and Sons)
Information Systems Research (Informs)
International Journal of Human Resource Management (Routledge)
Journal of Accounting and Economics (Elsevier)
Journal of Accounting Research (University of Chicago)
Journal of Applied Psychology (American Psychological Association)
Journal of Business Venturing (Elsevier)
Journal of Consumer Research (University of Chicago)
Journal of Finance (Blackwell)
Journal of Financial and Quantitative Analysis
Journal of Financial Economics (Elsevier)
Journal of International Business Studies (Academy of International Business)
Journal of Marketing (American Marketing Association)
Journal of Marketing Research (American Marketing Association)
Journal of Operations Management (Elsevier)
Journal of Political Economy (University of Chicago)
Journal of the American Statistical Association (American Statistical Association)
Management International Review (Gabler)
Management Science (Informs)
Marketing Science (Informs)
MIS Quarterly (Mgmt Information Systems Research Centre, University of Minnesota)
Operations Research (Informs)
Organization Science (Informs)
Organizational Behaviour and Human Decision Processes (Academic Press)
Review of Financial Studies (Oxford University Press)
Sloan Management Review (MIT)
Strategic Management Journal (John Wiley and Sons)
The Accounting Review (American Accounting Association)
The American Economic Review (American Economic Association, Nashville)
The Journal of Business Ethics (Kluwer Academic)
The Rand Journal (The Rand Corporation)
