

Connelly Chronicle

JSTOR

Congratulations!

All La Salle University faculty, staff, and students are now authorized users of a JSTOR library.

JSTOR enhances our ProQuest and LEXIS/NEXIS access to full-text scholarly journal articles by providing the complete back files of a core group of scholarly journals. These issues have been digitized, starting with the very first issues, many of which date from the 1800s. As with ProQuest, the journal titles and holdings are in the library catalog; simply search by periodical title.

Over 4 million pages are now available. New titles and subjects are being added constantly. The capacity for searching across disciplines opens up new possibilities for scholarship and research.

How do I use JSTOR?

You access the JSTOR collection directly from the library homepage: (www.lasalle.edu/library) by clicking on Research/Periodical Indexes and

Databases and going to the JSTOR link. From this page you have the option to search the full text of the collection or browse by journal title.

We will soon be adding JSTOR to our proxy server, which will allow you to access this resource from off-campus,

Instead of searching bound volumes, check the library catalog for JSTOR.

La Salle University Library

Volume 16, Issue 1

Spring, 2002

Points of Interest

- ☺ JSTOR adds "volumes" to Connelly Library's periodical collections
- ☺ CQ Researcher for "hot" and controversial topics
- ☺ New Information Technology and Business Databases
- ☺ Turnitin.com detects plagiarism for faculty and students

CQ Researcher

The CQ Researcher explores a single "hot" issue in the news in depth each week. Topics range from social and teen issues to environment, health, education and science and technology. 44 reports are produced each year including four expanded reports.

The CQ Researcher's hallmark is scrupulous objectivity and balance. Every 12,000-word report is written by an ex-

perienced journalist and features comments from experts, lawmakers and citizens on all sides of every issue. Numerous charts, graphs and sidebar articles -- plus a pro-con feature, a chronology, lengthy bibliographies and a list of contacts -- round out each report.

The objective, forward-looking reporting that characterizes these articles is

designed to encourage discussion, to help readers think critically and to facilitate further research. Each CQ Researcher examines a single topic of public concern, such as parental rights or Middle East peace. It gives the reader a broad overview of the subject, including the historical background and a discussion of the current controversies and initiatives.

To locate an issue, search by keywords, display the index in PDF format, or browse the lists by date or topic. The "Find a Topic" option lists suggestions from recent issues.

using your alpha username and password.

Enter J STOR by clicking on the Enter J STOR icon on the Library Homepage.

Browsing: Find journal issues and articles by clicking on "Browse the Journals," and then the name, volume or issue of the journal that interests you.

Searching: Enter basic and advanced searches of keywords, topics, titles, authors and dates by clicking on "Search the Journals" and typing information about your search requirements. Perform cross-disciplinary searches by selecting several journals in one search.

Over 4 million pages are now available

Navigating: Everything you need to move through J STOR is on the navigational toolbar located on the left of the screen.

Printing: Optimal printing from the J STOR collection requires J PRINT, our special helper application.

JSTOR provides the complete back files of a core group of scholarly journals. .

When you are viewing an article, the "Print Article" button on the navigational toolbar will lead you to a page where you may set your printing options using the "Set Preferences" feature. First-time users may download J PRINT from this page. You may also choose to print using Adobe Acrobat.

Reuters Business Insight

YCONSUMER GOODS YENERGY
YFINANCE YHEALTHCARE YTECHNOLOGY

Reuters Business Insight reports provide a concise yet complete overview of each of the above sectors. By examining the topical issues and key market drivers,

Reuters publishes analyses and forecasts necessary to make the right decisions at the right time.

Blue chip companies across each of the industry sectors worldwide trust Reuters management reports to deliver quality data and market analysis at a competitive price-point.

The primary research and analysis are derived from:
proprietary analysis techniques
quantitative and qualitative data
independent expert authors
access to key industry players
unparalleled database and library resources

Gartner

Gartner Advisory Intra Web: a single source access to all levels of Gartner research. Gartner's team of over 1200 analysts covering aspects of IT provides incomparable research capabilities. This includes strategic evaluations of technologies, IT vendor evaluation, market insight, industry trends/directions, vendor perspectives, and tactical IT vendor analysis. Access to Gartner helps students and faculty to keep pace with the speed of IT and the ever-changing scope of the industry, from both an

Gartner information can reshape an enterprise and improve the bottom line.

IT and business perspective.

The analysts' reports are organized into the following ten IT areas of expertise:

- Applications Development
- Customer Relationship Management
- Distributed Computing
- E-Business/e-Commerce
- Electronic Workplace (including mobile and wireless technology)

Datapro

Datapro, a division of Gartner, Inc., delivers tactical analysis, data, and reliable, unbiased vendor and product information. Coverage includes details on 97,000 products from more than 12,000 vendors worldwide. Datapro Research Reports provides timely and objective information enabling members to better understand and accurately compare IT products, vendors and technologies.

The services have been organized into the following five areas of expertise:

1. Computer Systems and Software Library
2. Communications Library
3. Electronic Business Technologies
4. Financial Business Technologies
5. Healthcare Application Software

Datapro has been serving IT users and vendors for 30 years and is part of the world's leading independent

advisor of research and analysis to business professionals making information technology (IT) decisions. Thousands of organizations worldwide rely on Gartner Datapro to:

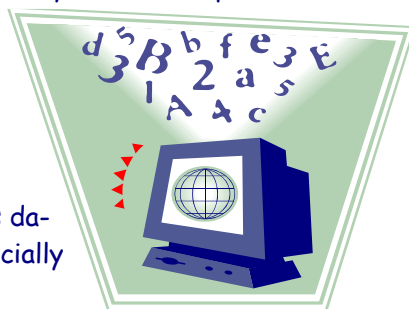

- Save time evaluating vendors, products, and technologies;
- Understand new and existing technologies and markets;
- Avoid costly mistakes when implementing technology solutions;
- Analyze the competition from a global perspective; and
- Compete successfully in the fast paced IT marketplace.

Provides objective analysis that helps clients stay ahead of IT trends, directions and vendor strategies.

FAITS: Faulkner's Advisory for IT Studies

More than 1200 clearly written reports covering all of the most important technology areas: data networking, broadband, information security, electronic government, electronic business, the internet, business intelligence/content management, IT asset management, application development, mobile business, wireless commu-

nications, and more. This database was created especially for Academic libraries.

Faulkner's service is a **valuable tool** for acquiring, analyzing, and disseminating up-to-date market information and intelligence.

Plagiarism Trends

80% of college-bound students admit to cheating on schoolwork, yet 95% of them never get caught - *Who's Who Among American High School Students*

90% of students believe cheaters are either never caught or have never been appropriately disciplined - *US News and World Report poll*

A 1999 study by the Center for Academic Integrity found that 69 percent of professors catch one or more instance of plagiarism each year. And officials at some colleges say that in recent years they have seen a sharp increase in students cutting and pasting material into papers from Web sites without attribution, or purchasing term papers from online term-paper mills. - *The Chronicle of Higher Education*

Free Trial of Plagiarism Detection Resource

La Salle University is currently subscribing to a free trial of Turnitin.com. This website provides a valuable plagiarism detection resource to both students and faculty.

Features

Submissions are checked for verbatim content as well as content that contains a high degree of similarity when compared with content found on the internet and in databases. The software will also provide you with a citation of where the similarities in documents occur and will check the citations given in footnotes.

The software is available for use to both students and faculty. Assignments may be submitted to or by professors through the resource and checked for similarity. Faculty users have an inbox for each of their classes at Turnitin.com.

Faculty are able to sort, archive, and view papers according to a variety of criteria. Clickable student names also allow faculty to view the to-date submis-

sions of any current student.

Interested?

Please contact **Christopher Kibler** (951-1549 or kibler@lasalle.edu) for the necessary logon and password information if you are interested in participating in this pilot program. Our free trial of Turnitin.com is available immediately and will continue through March.

Turnitin.com also provides complete guides for Faculty and Students on their website: www.turnitin.com
