Ben Stein is one of the most famous economics teachers in history. This is due to his iconic scene as the annoying economics teacher in Ferris Bueller’s Day Off. Yet, in his real life off screen, Ben Stein is a compelling, humorous speaker on economics, politics, and daily life in America. Even before leaving home to study economics at Columbia University and earning a law degree at Yale University, Stein was immersed in the thrill of economics at home as a child in Silver Spring, Md., with his father, Herbert Stein, an economist, writer, and presidential advisor. It should not be surprising that, after this exposure, Stein focused on the study of economics himself. He was taught by some of the most renowned economics and jurisprudence in history, and those learning experiences have led him to share commentaries on economic, political, and social issues along with financial advice and breakdowns and analyses of how finance works, what motivates people to take advantage of it, and how to navigate its intricacies. Stein strives to make even economics funny, touching, and understandable. He lives in Beverly Hills and against terrorism.

The dean’s circle supports the Economic Outlook and students enrolled in the school of business. Your generous commitment is appreciated.
