2020 CACREP Vital Statistics Report
Master’s of Arts in Professional Clinical Counseling

Each year, the Counseling and Family Therapy Master’s Programs submits a Vital Statistics Report to the Professional Clinical Counseling Program accrediting body, The Council for Accreditation of Counseling and Related Educational Programs (CACREP). This report is a requirement of all CACREP-accredited programs, and must be publicly reported on the program website annually. The following information is for academic year 2019-2020:

- Number of graduates in the past year: 23  
  Reflects the combined total number of graduates from Summer 2019, Fall 2019, and Spring 2020

- Program completion rate: 66%
  Reflects the percentage of admitted students who graduate from the program within the required time (7 years). Note that completion rates are difficult to measure with precision as students may transfer internally to another program that is a better fit or decide to discontinue for personal or professional reasons (e.g., a conferred degree is no longer required).

- Licensure examination pass rate: 100%
  Reflects the National Counselor Exam (NCE) pass rate.

- Job placement rate of graduates: 78%
  Reflects the percentage of graduates actively seeking employment within 180 days of the date they received their master’s counseling degree who obtained employment in a recognized or related comparable occupation for which they were trained.
