February Health Tip

February is National Eating Disorders Awareness Month

Brought to you by Student Nurses’ Association of Pennsylvania (S.N.A.P) and the La Salle Health Advisory Committee

What is Disordered Eating?

Unlike a specific eating disorder, disordered eating includes a wide range of disordered eating habits. These include compulsive eating, habitual dieting, chaotic eating patterns, and emotional eating.

Disordered eating may cause the individual to feel tired and depressed, decrease mental functioning and concentration, and can lead to malnutrition and additional health issues.

Tips to help with Healthy Eating

- Dieting is not the best way to lose weight.
- Do not ignore hunger signals or skip meals.
- Fat free eating is NOT healthy eating.
- Exercise to be healthy— not to burn off fat and calories.

The next time you have negative thoughts about your body image, please remember that every BODY is different.
