2025 CACREP Vital Statistics Report Master's Program in Professional Clinical Counseling

Each year, the Master's Program in Professional Clinical Counseling submits a Vital Statistics Report to its accrediting body, The Council for Accreditation of Counseling and Related Educational Programs (CACREP). This report is a requirement of all CACREP-accredited programs, and must be publicly reported on the program website annually. The following information is for academic year 2024-2025:

- Number of graduates in the past year: 22
Reflects the combined total number of graduates from Summer 2024, Fall 2024, and Spring 2025.
- Program completion rate: 69%
Reflects the percentage of admitted students who graduate from the program within the required time (7 years). Note that this completion rate reflects students who transfer to another program within La Salle that is a better fit or who discontinue for personal or professional reasons (e.g., a conferred degree is no longer required).
- Licensure examination pass rate: 88%
Reflects the National Counselor Exam (NCE) pass rate. It should be noted that this only includes reporting data from Fall 2024 and Spring 2025 (8 students/alumni tested, 7 students/alumni passed).
- Job placement rate of graduates: 82%
Reflects the percentage of graduates actively seeking employment within 180 days of the date they received their master's counseling degree who obtained employment or were admitted into a doctoral program in a recognized or related comparable occupation for which they were trained.
